The space we live in is an experience and how you experience your home is more important to you than it is to anyone else. Brooke loves working with clients to create spaces that allow people to live the way they want to live in their homes.

Brooke brings the vision and skills needed to transform your living space into a place that you'll love to call home. From the early stages of discussing a renovation, she will collaborate with you to create a clear picture of what you want to accomplish. Brooke will work with you to determine where you are on the style spectrum—from contemporary to traditional with layers of formality. Brooke takes the time to understand how you live and operate in your current environment and she starts working to solve space utilization chal-

lenges and capture valuable unused space for the renovation plans.

Beyond the floor plan, materials, and finishes, the renovation process involves determining which furnishings you want to keep, refinish, recover or repurpose and what new pieces should be integrated.

Brooke believes the space we call home should include some sense of history and provenance. Integrated should be elements that support the way people really live today. From early concept to the final experience, Brooke can help you identify and create a home that integrates function and style beautifully.

Please call or email today for information on how Brooke can help you. ■
